

TRANSAMERICA PYRAMID

How to build the paper model featured in the book *American Landmarks: Miniature Models to Cut and Assemble* by Matt Bergstrom (©2012 Dover Publications, Inc.)

1

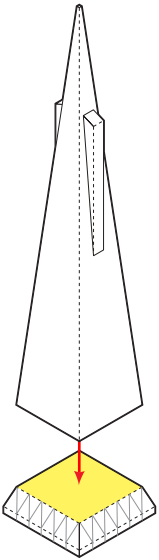

Cut out the base of the pyramid A. Fold the sides down and glue the flaps at the corners.

2

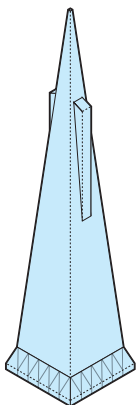

Cut out the skyscraper walls B, fold and assemble into a pyramid.

Cut out the two elevator shafts C and assemble them individually, then glue the elevators to the sides of the skyscraper.

3

Finally, glue the bottom edge of the pyramid to the base.

Now your paper model of the Transamerica Pyramid is finished!
